

Karen Maurey

Karen Maurey directs the Technology Transfer Center (TTC), National Cancer Institute, National Institutes of Health (NIH). TTC provides technology transfer services to the National Cancer Institute and 10 other Institutes at the NIH. Ms. Maurey has over 15 years of experience in technology transfer, and has received the NIH Award of Merit for developing and teaching technology transfer courses to scientific and administrative staff. Previously Ms. Maurey worked as a team leader for medical device evaluation at the Food and Drug Administration and as a biotechnology examiner for the U.S. Patent Office. She also worked in industry and university research laboratories. Ms. Maurey is a registered patent agent and holds a master's degree in Cell Biology from Johns Hopkins University.
