

HOTTEST PARTNERSHIP

Bringing Collaboration & Distance Learning to Underserved Populations

Larry Triola, Naval Surface Warfare Center – Dahlgren

The purpose of this partnership is to exploit “Collaborator,” patented technology to incorporate into a long-distance learning capability. The “collaborator” software brings a customizable collaboration environment that can be hosted on a simple, thin client architecture. The application will be Native American children. The primary players include the Naval Surface Warfare Center – Dahlgren, the patent holder who is engaged in an Educational Partnership Agreement with Montana State University and a CRADA with Abaelen Academy.
