

Business Opportunities through Technology Transfer

January 29, 2009, 8:30 am to 4 pm.

Salisbury University, Guerrieri Center (Located off Route 13 South in Salisbury, Maryland)

No attendance fee, but pre-registration is required

[Register early to ensure participation in this exciting event--100 business limit](#)

Collaborate on technology solutions to meet today's challenges. Learn about new technology transfer opportunities with Federal Labs and universities. Join state and local economic development professionals to leverage advancing technology for new business opportunities in a renewing economy. And get assistance in solving individual business problems.

Opportunity to display your Company's technologies and R&D capacities (space is limited, register early)

This unique conference will help business opportunists learn:

- Which technologies are available for transfer
- How to find opportunities that match your aspirations
- How to transfer that technology and integrate it into your business
- How some Eastern Shore companies have already benefited by successful partnerships.

Emphasis areas will include environmental monitoring, biobased products, and robotics, both from the podium and in problem-solving, break-out workshops designed to encourage interactions. Lessons learned will help you achieve success in other areas as well.

Sponsors: Mid-Atlantic Federal Lab Consortium, Chesapeake Bay Region Technical Center of Excellence, Maryland TEDCO, Maryland Department of Business and Economic Development, Mid Shore Regional Council, Tri-county Council for the Lower Eastern Shore of Maryland, Caroline Technology Park, Salisbury University and the Small Business Development Center, the Rural Development Center at the University of Maryland Eastern Shore and the University of Delaware.

Register: Registration includes lunch. Register at
