

## Technology Transfer and Innovation Forum Series

The Technology Transfer Society, Washington Chapter

[www.t2sdc.org](http://www.t2sdc.org)

The Technology Transfer and Innovation Forum Series is a monthly, noon hour meeting, organized by the Washington Chapter of the Technology Transfer Society along with a number of DC regional organizations including the Federal Laboratory Consortium Mid-Atlantic region.

The Forums are intended to provide critical links and enhanced understanding, in the unique and vital area of the Nation's capital, among the diverse communities concerned with all aspects of the transfer of technology from research to application and commercialization. The meetings provide insight into evolving ideas and present working models, as well as offering networking opportunities, to the various groups concerned with producing economic benefits by technological innovation. These include:

- Entrepreneurs and business leaders concerned with viable commercialization of technological innovations
- Federal, State, and local economic policymakers
- Practitioners of technology transfer and technology based economic development
- Academics concerned with the theory and evaluation of the process
