

MODELING, SIMULATION & ANALYSIS COUNCIL

01/04/07

A new initiative in Maryland, the "Modeling, Simulation & Analysis Council," began operations today with its first conference, held at Annapolis, Maryland. The mission of the organization is to facilitate the expanding role of modeling, simulation and analysis in today's environment. It intends to serve as a link between government, industry, and academia engaged in research, development and applications of MS&A technology. It wants to help form partnerships, initiate new efforts, forge regional coalitions, establish leadership activities, support R&D and training activities and disseminate MS&A lessons learned.

Focus areas include:

- Medical (both military and civilian)
- Transportation
- Homeland security
- Environmental
- Aviation
- Law enforcement
- Mission rehearsal
- Systems operations
- Gaming
- Entertainment

A web site will be up shortly. For more information contact Star Mahaffey, Chairperson, at 443-717-1431 and smahaffey@choosemaryland.org
